

# Shade Sails

## Design and Functionality

Planex shade sails are a very efficient way of providing shade. At the same time, the three-dimensional shapes look fascinating and unique from every angle of view.

Because every shade sail is made to measure, you get a product that is custom-tailored to meet your requirements – be it a small shade sail, a sail construction with cost-effective system statics, or a large three-dimensional membrane with individual structural calculations. No matter which shade sail you order from Planex, there are two things they all have in common: shade sails provide relaxing shade and optimal protection from UV radiation.

## Applications

There are almost as many possibilities to use a shade sail as there are possible shapes, for example:

- Swimming pools, schools, and playgrounds
- Parks and event locations
- Terraces and gardens

Creating a safe playing environment for kids in particular requires more than installing a swing and a sandpit.

Shade sails protect from heat and ultraviolet radiation and thus provide untroubled fun for kids playing outdoors. The quality of a playground matters – it has a major influence on how often and how long children play.

# Advantages

As a result of carefully chosen high-grade materials, a high manufacturing quality and up-to-date machinery, Planex can offer you numerous advantages:

- Shade without darkening
- Heat reduction
- Optimal protection from ultraviolet radiation
- Various shapes and sizes available with cost-effective system statics
- Flame-resistant and non-toxic
- Dirt-repellent and easy-care coating
- Certified high-grade and eco-friendly textiles (100% recyclable)
- Extremely durable, robust and tearproof
- Easy mounting and dismantling
- Screens persons from view

## Service

Planex is a specialised supplier of customised solutions made from technical textiles. With a know-how gained in more than 30 years, Planex is your one stop shop for complete solutions – from consulting and planning right through to manufacturing and mounting.

Have we sparked your interest?  
We'll be glad to advise you!
